

# ONJ SERVICES

ELECTRICAL | MECHANICAL

**CAPABILITY STATEMENT**

## VISION

To be known throughout the manufacturing industry as the benchmark in overall facility maintenance with a particular focus on production machinery servicing.

## VALUES

We value honesty, relationships, excellence and a caring approach.

## MISSION

Remain adaptable and ever evolving to ensure we offer a service like no other in the industry. We aim to provide our clients with a holistic service opportunity that will streamline maintenance issues, increase their productivity and strengthen reliability due to our innovative business model of **closing the loop** for our clients.

## COMPANY BACKGROUND

ONJ Services is an all-encompassing support business for the manufacturing industry. We help manufacturing businesses to **close the loop** when it comes to repairing, maintaining and installing manufacturing equipment. Put simply, we have the people, resources and systems to do it all. We operate out of our Melbourne office, but we work with clients Australia wide.

## HISTORY

ONJ Services was born out of a need to be able to fully support our clients in all aspects of their manufacturing facility. Our team, with over 30 years' experience servicing the manufacturing industry, have the depth and knowledge we can draw on to help you in your business.

ONJ Services originally specialised as industrial electricians, however we felt our client's frustration when we would arrive on site to service or fix their electrical issue or conduct a regular maintenance, only to discover the client still needing to replace a part or were relying/ waiting on another trade to attend. The impact of these delays inevitably meant the reduction in production output along with a lot of thumb twiddling and frustration from our technicians as they couldn't do their thing.

Our formidable work ethic and resolute to provide our clients with an all-encompassing service for their facility lead us to evolve into the full- service support business we are today.

## WE KEEP MANUFACTURING BUSINESSES MOVING

Our strong sense of customer satisfaction and requirement is second to none, we can give our clients a service never experienced in the industry.

A photograph of a large industrial machine, possibly a press or extruder, with a blue frame and a control panel. The machine is situated in a factory with a high ceiling and large windows. The machine has a large cylindrical component and a control panel with many buttons and switches. A blue frame is visible, and the machine is supported by a metal structure. The floor is orange.

## INDUSTRY SECTORS

### FOOD

ONJ Services has over 30 years' experience in the food manufacturing industry Australia wide, this experience and knowledge we pass onto you to offer a full support service for the food manufacturing industry. Our innovative approach to all aspects of a manufacturing and processing facility will give an edge to any business, we design and create an accurate maintenance program to suit your business needs.

Our 24/7 emergency services will have your issue diagnosed efficiently and plan to correct, fix and prevent the issue from occurring with minimal disruption to production.

**We have worked with a variety of food manufacturing facilities including:**

- Fresh salad suppliers
- Sauces and accompaniments manufacturing
- Dairy based accompaniments
- Meat and small-goods manufacturers

### BEVERAGES

Our team have been involved with supporting the beverage industry for many years. Our planned maintenance programs, machine relocations and new line installation designs, will suit a wide variety of beverage production facilities. Our innovative designs are ahead of the curve and will meet/exceed expectations and give you peace of mind that your beverage manufacturing facility will run efficiently and reliably, long term.

**The types of beverage facilities that we work with include:**

- Boutique breweries
- Wineries
- Dairy based manufacturing facilities
- Fruit based beverage manufacturing facilities

### PHARMACEUTICAL

Our team are highly conscious of being sensitive towards the needs of the pharmaceutical industry. We pride ourselves on working closely with our clients to maintain a high level of integrity whilst creating a maintenance program to keep the facility safe and within all government guidelines and Australian standards. We understand how highly volatile the facilities can be in this industry and therefore we take all precautions necessary to keep all stakeholders safe.

## ONJ SERVICES

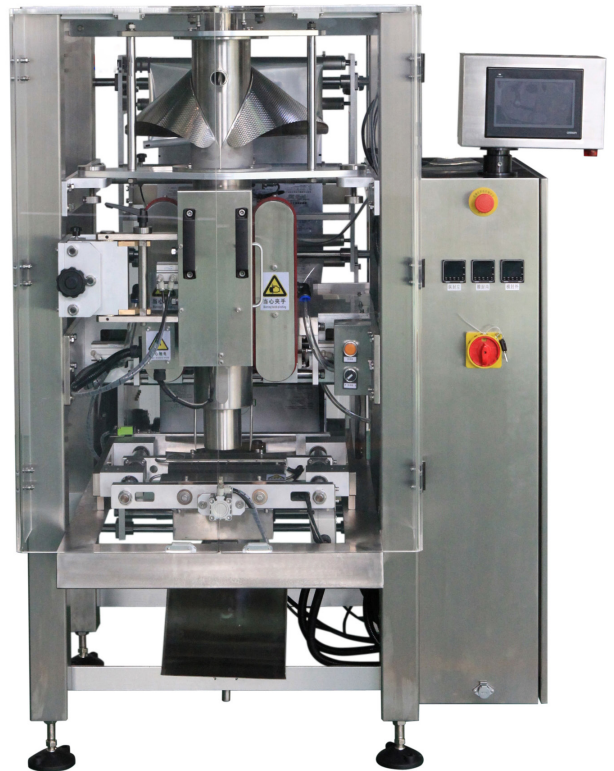

As ONJ Services keeps evolving in order to offer both current and new clients even more services, so you only need to make one phone call when you need help with; an emergency or run down older machinery, fitting out of a new space or creating a maintenance program to keep the manufacturing plant operating efficiently. We have the ability to be flexible and mobile to react to your needs.

### OUR EXPERT TEAM CONSISTS OF:

- ✓ Electrical/Mechanical Engineers
- ✓ Electricians
- ✓ Mechanical Fitters
- ✓ Refrigeration Mechanics
- ✓ Project Managers
- ✓ Plumbers
- ✓ Carpenters (Coolroom Construction)

### HOW WE CAN HELP YOU:

- ✓ Sourcing Machinery
- ✓ New Machinery: Spare Parts Sales & Service
- ✓ New Motors, Pumps & Gearboxes

We have the capability to fully service, create and design any sized manufacturing project. Our team use only the latest technology, high-quality products and spare parts. We look forward to providing our current and new clients with the continued high standards of work and customer service that our business is renowned for. We enjoy creating long term relationships with all of our clients.

# CAPABILITIES

We want to make your life easier by closing the loop when it comes to needing trades onsite. Our business is to take the stress away from you and your team. Let us worry about how your machinery is performing.

## MACHINERY SERVICE, REPAIR & MAINTENANCE

- ✓ Service and repair of all production machinery
- ✓ New machinery installations to Australian standards
- ✓ Equipment integration and networking
- ✓ Process machinery control
- ✓ Machinery safety evaluations
- ✓ Engineering / drafting / schematics
- ✓ Preventative maintenance implementation
- ✓ Machinery relocations
- ✓ Emergency breakdown repairs 24/7

## DESIGN & INSTALL

Our team of highly trained expert technicians will work together with your building and design team to create an install that is appropriate for the products that will be manufactured - to gain the highest efficiencies for the business and produce the best results to reach budgets for your business.

- ✓ All new machinery installs are completed and handed over with full safety checks to be compliant with Australian standards.
- ✓ We will design and fully install equipment integration and networking to guarantee smooth operating systems for the facility.

## MECHANICAL DESIGN & FABRICATION

- ✓ Modifications and upgrades to existing equipment
- ✓ Repair and modify all aspects of high-speed production machinery
- ✓ Safeguarding of machinery
- ✓ Specialised fabrication of stainless steel for food production machinery
- ✓ Troubleshooting hydraulic and pneumatic systems
- ✓ Onsite and offsite welding (TIG-MIG)
- ✓ Emergency breakdown repairs 24/7

## REFRIGERATION DESIGN & INSTALLATION

- ✓ Design and install refrigeration systems for new production facilities
- ✓ Upgrade of current production facilities
- ✓ Equipment integration and networking
- ✓ Service and maintain and components of refrigeration systems including motors, pumps and gearboxes sales.

## SCHEDULED MAINTENANCE

We work with you to design and disseminate regular scheduled maintenance programs for your production machinery. The agreed upon schedule will suit your timeframes and schedules to minimise disruption. Our bespoke maintenance programs will minimise the risk of sudden breakdowns and disruptions to facility production. The program is designed with your specific facility needs and specific machinery functions- that will increase the lifespan of the machinery and reliability of the functionality of the facility.

## EMERGENCY BREAKDOWNS

We offer an efficient and reactive 24/7 call out service.

Call us to fix any type of equipment including:

- ✓ Multihead Weighers
- ✓ Packaging Machines
- ✓ High Speed Sorting Machines
- ✓ Grading Machines
- ✓ Pillow Folding Machines
- ✓ Meat Mixers
- ✓ Mincer Machines
- ✓ Vacuum Packaging Machines
- ✓ Thermoforming Machines
- ✓ Dough Mixers
- ✓ Fresh Vegetable Cutting Machines
- ✓ Nut Grading Machines

Large production machinery that have broken down - we can fix onsite to offer minimal amount of disruption to production.

# ONJSAFE

Our services have expanded to provide you with a full safety service for your business. We have a specialist team that will design and create for you an evacuation program including all essential services, to keep compliant and minimise disruption of production. We will take the planning and scheduling away for you, so you can concentrate on your production.

## We will create a program to:

- ✓ Test and maintain all evacuation lighting to Australian standards
- ✓ Test and tag all electrical appliances throughout the facility
- ✓ Thermal imaging
- ✓ Voltage/current analysis relying on the latest technology
- ✓ Fire extinguisher and fire blanket maintenance
- ✓ Residual current device testing
- ✓ Microwave testing

Our programs are designed to keep all staff safe within their workplace and keep the facility compliant. Our team will check all emergency and exit lighting as part of the specifically designed program to keep them functioning and compliant.

As part of our safety program we use the latest thermal imaging technology that can find and assess faults in the electrical system of a facility and prevent any issues from causing a system failure.

The latest project management software, enables us to provide the best possible service and on-time results for our clients.

## WHY CHOOSE US

Our first initial visit to your facility will involve a full audit of the functionalities and requirements of the business, using our auditing system. The audit is completed at no cost, but its actual value to you is priceless. It allows us to better understand your particular needs and the intricacies of your facility/ business which results in saving you time and money in the long run.

### CLOSING THE LOOP

ONJ Services has the team to support you and your business, whether it is electrical, mechanical, refrigeration or plumbing we will manage the full maintenance for your facility. We will work alongside your maintenance manager and support your team to minimise their workload, so your team can focus on productivity and reliability of your facility.

### FACILITY AUDITS

Our first initial visit to your facility will involve a full audit of the functionalities and requirements of the business, using our auditing system. Our audit that we conduct is completed at no cost to you- it allows us to better understand your business and the intricacies of your business needs. This will save you time and money in the long run.

### FAST RESPONSE TIMES GUARANTEED

We get back to you fast- we GUARANTEE a two-hour response time. We will have a solution for you quickly, so you can have peace of mind that you are in safe hands. We know the importance of keeping your business moving.

### COMMITTED TO PRIVACY

We understand that privacy and non- disclosure is vital for your business. We respect that this is a major concern for you. All of our staff members sign a non- disclosure statement at the commencement of their employment with us, which applies to all projects that they will be involved with.

### CUSTOMER PORTAL

Each client receives a unique code which gives them access to our private client portal (SimPro), this allows our clients to track the status of their project and offers another opportunity of being fully transparent to all of our clients.

## MANAGEMENT PLAN

**ONJ Services** is dedicated to understanding our customer's needs and delivering a quality service that meets their expectations and contract specifications.

ONJ Services will always comply with relevant legislative requirements and industry codes.

The Company embraces best practice to ensure a quality service while operating in a safe workplace with minimal impact on the environment. Specific company objectives and targets are planned and regularly reviewed.

**HSEQ**  
MANAGEMENT SYSTEM

Management is dedicated to the philosophy of continual improvement. To support this philosophy ONJ Services has developed and implemented a HSEQ Management Manual addressing workplace safety environmental and quality issues.

The HSEQ Management Manual is embraced by management and employees alike. Induction training of new employees ensures they are trained in the System as they join the Company.

All employees are responsible for the quality of their own work but are supported by Supervisors and documented procedures, where required. Management fully endorses this Quality Policy and the HSEQ Management Manual that has been implemented.

ONJ Services is committed to all safety regulations, environmental control and quality of works delivered. Each project undertaken by our company is subjected to the following plans before any works begin:

- ✓ **Quality Management Plan**
- ✓ **Environmental Management Plan**
- ✓ **WHS Management Plan**

# PROJECTS

## CLIENT: VISY

**Project date:** August - September 2019

**Location:** Broadmeadows

### **Cut / Crease and Robot Upgrade:**

Installation of all field wiring and devices, sensors, vsd's, sew movements, PE cells, etc.

Integrate conveyors, spiral conveyors, box erectors, robots, etc using the latest PLC'S and system technologies.

Assist with implementation of AZI nodes, networks & commissioning.

Install the HMI panel and integrate it with PLC and fault controls.

## CLIENT: PM FRESH

**Project date:** January 2018

**Location:** Broadmeadows

### **Centrifuge / Wash Line Upgrade:**

Design and build a control panel for New Centrifuge.

Design and build a control panel for New cutting table.

Install all field wiring to Intercell belt motors including feedback for control

Install all safety controls to cat 4

## CLIENT: EZYCHEF

**Project date:** October 2018 - January 2019

**Location:** Broadmeadows

### New Plant Install:

Install and integrate new Heat site mapping technology.

Design and install new Sub/boards for power distribution.

Integrate PLC controls and Networks.

Wire and commission vegetable extruder, Aseptic filler and Pasteurizer.

## CLIENT: CHRIS' FOODS

**Project date:** April 2019

**Location:** Thomastown

### Safety Upgrades:

CAT 3 & CAT 4 Safety Upgrades.

AS4024 Compliance.

Machine safety design.

Maintenance safety implementation.

Safety Software Integration.

Estops, Light curtains, guard switches, trapped key switches, safety laser scanners,

2 hand controllers, Extra points to add to safety.

We are distributors and service agents in Australia and New Zealand for:

## Thermal Printheads

## Barcode Label, POS & Flexible Packaging Printers

**We keep machinery moving 24/7**

Specialising in food & beverage facilities
